SUMMARY

B.Tech Computer Science student (Artificial Intelligence specialization) with hands-on experience building Machine Learning and Data Science projects in Python, from model development and evaluation to deployed APIs and dashboards. Eager to apply predictive modeling and data analysis skills to real-world datasets.

EDUCATION

Parul University, Vadodara, Gujarat Aug 2023 – Expected May 2027
B.Tech in Computer Science, Specialization in Artificial Intelligence | CGPA: [6.96/10]

Aninence Public HS School (Class 12th), 74.8% 2021 – 2023

Holy Trinity School (Class 10th), 75.6% 2019 – 2021

SKILLS

Languages: Python, Java, Data Structures & Algorithms (DSA)

Machine Learning & Data Science: PyTorch, Hugging Face (DistilBERT), LSTM, NumPy, Pandas, Predictive Analytics, Model Evaluation & Optimization

Backend: FastAPI, Flask, Node.js, Express.js, REST APIs, JWT Auth

Frontend: React, Tailwind CSS, HTML, Streamlit

Tools & Databases: Git/GitHub, Docker, MLflow, MongoDB, AWS, Vercel, Render, VS Code

PROJECTS

LSTM Stock Price Predictor | *Python, PyTorch, FastAPI, Streamlit, Docker, MLflow* | GitHub: [link]

- Built an end-to-end predictive analytics pipeline in Python and PyTorch on 6+ years of stock data, training and evaluating a stacked 2-layer LSTM model that achieved <3% MAPE.
- Deployed the model with a FastAPI backend and Streamlit dashboard for real-time inference, using Docker and MLflow to ship the system to Render.

Sentiment Analysis App | *Python, DistilBERT, Hugging Face, REST API* | Live: [link]

- Developed a REST API for real-time text classification using DistilBERT transformer models, and optimized the backend processing pipeline to reach sub-200ms inference latency.
- Built an interactive web dashboard that visualizes sentiment scores and trends from raw text input.

Trip Smart | *Full-stack travel management system* | Live: [link]

- Built an end-to-end travel management system with automated budget allocation and real-time transit integration.
- Developed a recommendation engine that uses user preference data to generate personalized itineraries, reducing manual planning time.
- Implemented secure RESTful APIs for itinerary management and integrated third-party maps for route visualization.

CERTIFICATES

- Data Analytics Job Simulation (Tata/Deloitte): data analysis and visualization, 2025
- Data Science Job Simulation (British Airways): predictive modeling for customer sentiment analysis, 2025
- IBM/Cisco AI Fundamentals; AWS Cloud Foundations, 2025
